

Swedish Vocabulary Crosswords for English Speakers - CEFR B1: Mixed English–Swedish clues and answers in every grid to build confident intermediate ... Swedish A1-C1 series for English Speakers)

B1 is where Swedish starts to feel independent — and where vocabulary needs to become faster, broader, and more reliable. This book is designed for English-speaking learners who want to strengthen the vocabulary and spelling that supports real conversation, real reading, and confident writing. The puzzles use a distinctive mixed-language crossword format: English and Swedish answers share the same grid, and the clues alternate between both languages.

So you practise exactly what intermediate learners need most:

- English clue → Swedish answer
- Swedish clue → English answer

That repeated switching trains active recall and improves fluency far more than passive word lists.

What you'll get from B1

- A stronger, more accessible Swedish vocabulary range
- Better spelling accuracy (including Å/Ä/Ö)
- Increased speed retrieving Swedish words when speaking or writing
- The satisfaction of completing challenging puzzles that reinforce learning

Stepping-stone approach

This B1 book continues a structured path (A1 → A2 → B1 → B2) for learners who want a clear route upward — including those aiming eventually for certification.

Important note about certification and wordlists

Swedex offers public information and mock exams but does not publish a single official public vocabulary list. This book is therefore an independent learning aid using a carefully collated

CEFR-aligned vocabulary selection from publicly available resources, supported with English glossing. It is not affiliated with or endorsed by Swedex/Folkuniversitetet.
