

Swedish Vocabulary Crosswords for English Speakers - CEFR C1: English–Swedish Mixed-Grid Edition for Advanced Learners (the CEFR Swedish A1-C1 series for English Speakers)

Take your Swedish beyond “comfortable” and into truly advanced territory.

This CEFR C1 volume is designed for English-speaking learners who want a stronger vocabulary range, faster recall, and more confident Swedish in real reading, real conversation, and real writing. Instead of passive word lists, these puzzles train what advanced learners need most: active recall.

A unique mixed-language crossword system

Every puzzle uses a distinctive format where Swedish and English answers appear together in the same crossword grid.

Clues deliberately switch direction throughout:

- English clue → Swedish answer
- Swedish clue → English answer

That two-way switching forces retrieval in both languages and helps turn “I recognise that word” into “I can produce it accurately”.

Why C1?

C1 is the level where Swedish becomes flexible and precise: you can follow complex ideas, express nuance, and operate with fewer gaps. If you’re preparing for Swedish certification goals such as Swedex (which offers certification up to C1), this book is designed as a focused vocabulary-and-spelling companion alongside broader reading, listening, speaking and writing practice.

What this book helps you build

- Advanced Swedish vocabulary and spelling (Å/Ä/Ö included)
- Faster recall under light puzzle pressure

- Two-way translation agility (English ⇌ Swedish)
- A structured, motivating stepping-stone approach to advanced competence

Transparency note

Swedex does not publish an official CEFR vocabulary list. The vocabulary used here is therefore a carefully collated, CEFR-aligned selection drawn from publicly available lexical sources and organised for puzzle-based learning. This book is an independent learning aid and is not affiliated with or endorsed by Swedex/Folkuniversitetet.
