## **Russian Vocabulary Crosswords for English Speakers – CEFR B2: Advanced vocabulary puzzles for confident, high-functioning Russian**

**979-8252731032**

**Take your Russian further with 100 challenging bilingual crosswords designed for serious learners.**

If you already have a solid foundation in Russian and want to move beyond the intermediate stage, this book offers a fresh and rewarding way to expand your vocabulary, reinforce spelling, and build confidence at the CEFR B2 / TRKI-II level.

This volume contains **100 bilingual crosswords** designed for learners ready to handle a broader, richer, and more demanding range of Russian words. At B2, vocabulary becomes more precise, more flexible, and more useful for real communication. You are no longer limited to basic everyday survival language. Instead, you begin to work with the kind of words that help you understand more complex texts, follow discussions more comfortably, and express yourself with greater accuracy.

What makes this book different is the way the vocabulary has been selected. The word list was compiled with reference to recognised Russian-language learning standards and lexical sources associated with TRKI-II/B2, then filtered to exclude words already used in the earlier **A1, A2, and B1** books in the series. The result is a more focused B2-level collection of new lemma words, giving this book a distinct identity and making it a genuine next step rather than a repetition of earlier material.

**These crosswords are designed to help you:**

- Strengthen your active Russian vocabulary
- Reinforce spelling through repeated exposure
- Reactivate words you may have forgotten
- Improve recall speed and accuracy
- Notice patterns in word formation and usage

- Make serious vocabulary study more enjoyable

**This book is ideal for independent learners, advanced beginners moving upward, intermediate and upper-intermediate students, teachers seeking supplementary material,** and anyone who enjoys learning through puzzles rather than memorising isolated lists.

Because each crossword encourages you to retrieve vocabulary from memory, this book can help transform passive recognition into active knowledge. Instead of simply reading a word once and forgetting it, you engage with it, test yourself, and meet it again in a more memorable way. That repeated contact is one of the most effective ways to make vocabulary stick.

Whether you are studying for personal interest, preparing for higher-level Russian study, supporting classroom learning, or simply looking for an intelligent and enjoyable challenge, this book offers a practical way to keep progressing.

**Inside this book, you will find:**

- 100 bilingual Russian crosswords
- Vocabulary aimed at CEFR B2 / TRKI-II level
- A carefully filtered list focused on new B2 words
- Solutions included
- An engaging format for revision, review, and self-study

If you enjoyed the earlier books in the series, this volume will take you further. If you are joining the series at a higher level, it offers a stimulating way to test yourself and extend your command of Russian.

**Build your vocabulary. Reinforce what you know. Discover what you do not yet know. And make your Russian stronger, one crossword at a time.**
